

Training on Wood Biomass from Agrarian Pruning and Plantation Removal (APPR)

How to support entrepreneurs interested in setting-up a new value chain based on APPR biomass

Get to know a new way to manage woody residues from pruning and plantations removal

A huge potential in Europe...

More than 20 million tons per year that can support rural development and circular economy, as well as improvement of air quality.

... that can be used as renewable and sustainable energy

Feedstock similar to forest wood, and can be used as biomass in greenhouses, farms, district heating or agro-industries.

GRANT CRITERIA

- Already participated in the online channel of the project (4 points)
- Be part of an agrarian association or organization that uses to give consultancy to farmers or cooperative (3 points)
- Have already notions of APPR biomass (2 points)
- Granted consultants will be committed to carry out a dissemination activity in their own country (a course, a consultancy, or other similar activity).

PROGRAM

- Get a first insight into APPR biomass for energy and main issues for organizing and starting a new value chain based on APPR biomass
- Learn most usual consultant questions and doubts in the areas of APPR biomass mobilization and value chains development
- Learn how to use the Consultancy Handbook and get trained with some examples

Forum is Limited to 20 participants
